# Message from ATP

The Association of All Japan TV Program Production Companies (ATP) is an organization of 119 production companies. The majority of programs broadcast by Japanese broadcasting stations are produced by ATP member companies.

The member companies produce a wide variety of programs, ranging from dramas to documentaries and entertainment shows. It goes without saying that the ATP is a representative group of Japanese production companies that have talented personnel and excellent project planning and production abilities.

All of the productions listed in this catalogue were selected with confidence by professional producers.

We, the producers, deliver innovative productions to all parts of the world. Some are sad, some are humorous, and some are heart-warming. We hope you will have a look at our engaging productions that exemplify the passions of their creators and are all of high quality. It is our belief that the needs of the viewers in your country will be satisfied.

In addition, we at ATP set up opportunities for joint productions with overseas producers. If you intend to produce content for distribution in the global market and if you are seeking competent production partners, please take advantage of this occasion to contact some of the production companies belonging to our association.

It is our sincere desire to contribute to the success of your business and to facilitate global cultural interaction.
